

GEEKAY

INDUSTRIAL ENTERPRISES

*"Pioneering design and manufacturing
excellence."*

Vision, Mission & Values

Vision

"To engineer a smarter, safer and more sustainable future through innovation, integrity and excellence."

Mission

"To deliver innovative, reliable and sustainable engineering solutions that meet the highest standards of quality and precision — creating value for our clients, strengthening industry through advanced technology, and contributing to a better, smarter and more sustainable future."

Values

◆ Integrity & Ethics

◆ Innovation & Creativity

◆ Excellence in Quality

◆ Safety First

◆ Continuous Learning & Growth

Company Overview

At GEEKAY, we are a team of technocrats excelling in the design and manufacture of jigs, fixtures, press tools and die-casting dies. Equipped with advanced CNC, VMC and power-press machinery, we manage projects from conception to completion — including specialized tooling for traction motors and auto stack cores.

MAKE IN INDIA

We Innovate Import Substitutes

We develop indigenous alternatives to imported items — reducing reliance and lead times while maintaining original quality standards.

CONSULTING

Process Optimization

Our experts analyse existing processes, identify inefficiencies and recommend best practices that streamline operations, reduce cost and improve productivity.

Production Capabilities

State-of-the-art techniques meet diverse production needs, with a dedicated press shop catering to both batch and mass production of parts.

End-to-End Handling

From first drawing to finished line — design, tooling, machining and production stay under one accountable roof across our two manufacturing units.

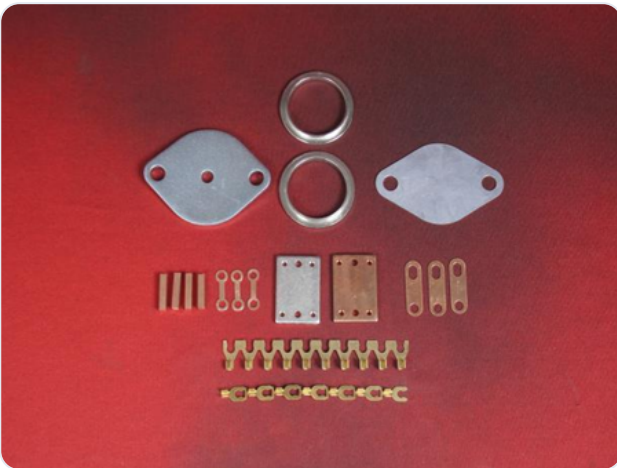

In-House Infrastructure

Precision held in-house — power presses, CNC lathe, twin VMCs, EDM wirecut and radial drilling, so tooling and production never leave our control.

SR	MACHINE DESCRIPTION	MAKE	CAPACITY / SIZE
01	Power Press	Rajesh, Rajkot	25 Ton
02	Power Press	Atlas Machine Tools	75 Ton
03	CNC Lathe	Global	Swing Dia 250 × 750 mm
04	VMC	Cosmos	Bed 1000 × 800 mm
05	VMC	BFW	Bed 1000 × 1000 mm
06	EDM Wirecut	Electronica	450 × 600 mm
07	Radial Drilling Machine	HMT	—

A dedicated press shop supports batch and mass production, while CNC & VMC platforms deliver tight-tolerance components for the motor, semiconductor, turbine and oil-rig industries.

Press Parts

Motor & Semiconductor Industries

Precision-stamped press parts produced in our dedicated press shop for high-volume, dimensionally consistent supply.

Up to 4 mm thickness

Batch & mass production

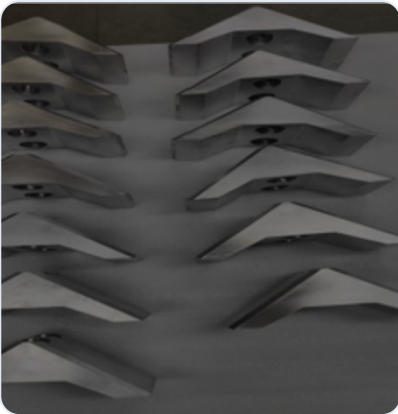

Dedicated press shop

Conical & Plane Washers

Washers of various sizes up to 4 mm thickness, available in batch and mass production runs.

VMC Components

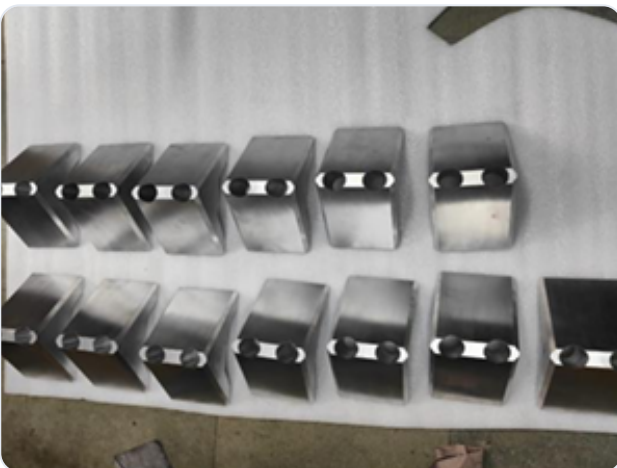

Precision-Machined for Motors & Steam Turbines

Components machined to tight tolerances on our Cosmos and BFW vertical machining centres, serving motor, steam-turbine and oil-rig industry applications.

Tight tolerances

Twin VMC platforms

Oil-rig grade

Hexagonal & Allen Bolts

CNC-Machined High-Tensile Bolts

All types of hexagonal and Allen bolts, designed and manufactured to your required specifications — engineered for strength, accuracy and repeatability.

High-tensile grade

Hex & Allen types

Made to specification
